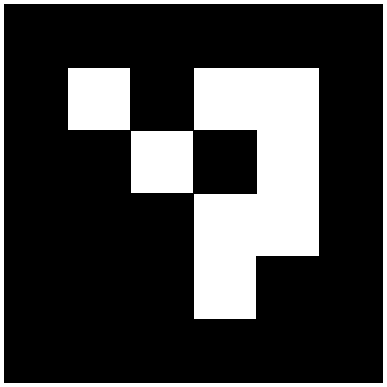
# BikeSense scale cards

Print at 100% / "Actual size" (NOT "Fit to page"). Then measure the black square side with a ruler and write it in docs/aruco_card.json as measured_marker_mm. Keep the cards flat; don't cover the white margin.

cut



## Card A: CHAIN

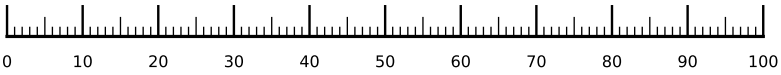
ArUco DICT_4X4_50, ID 0

Black square side (nominal): 50 mm

Tape to the swingarm, level with the chain, facing the camera.

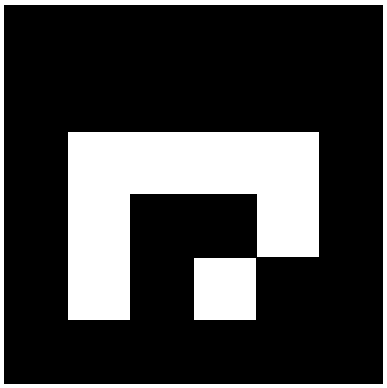
Measured side: _____ mm

*Same card, same spot for before AND after scans.*



mm: this bar must measure exactly 100 mm

cut



## Card B: OIL

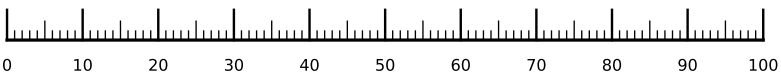
ArUco DICT_4X4_50, ID 1

Black square side (nominal): 50 mm

Place on the drip cardboard / next to the dipstick, flat, facing the camera.

Measured side: _____ mm

*Same card, same spot for before AND after scans.*



mm: this bar must measure exactly 100 mm
